

About us

MIDASoft was officially incorporated in September 1, 2000, and became Korea's leading software development company in the Civil & Geotechnical engineering industries.

Currently, MIDAS IT, MIDASoft's parent company, is supported by over 600 structural software developers and engineers with significant experience.

In addition to developing engineering software, the company provides engineering consulting services, which include automatic design solution development, value engineering, safety engineering, design consulting, special purpose S/W development and structural design of major and specialty structures.

Since 2004, MIDASoft, Inc. (<http://en.midasuser.com/>) has been operated by MIDASIT. MIDASoft will continue to expand the reach of MIDASIT products in the North& South American markets by applying proactive marketing strategy.
